### **DETAILED ACTION**

Receipt is acknowledged of Amendment and Response filed on March 14, 2002.

Claims 1-32 and 59 are pending. New rejections have been made in view of claim amendments made by applicants.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-32 and 59 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. Patent No. 6274131 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are directed to a mascara composition which is in wax-in-water emulsion having at least one wax and film-forming polymers with overlapping limitations.

#### ***Claim Rejections - 35 USC § 112***

1. Claims 1-32 and 59 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as

to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification and abstract specifically state that the invention is directed to a composition comprising 10 percent by weight of "at least one wax". See spec. p. 2, lines 8 – 14 and abstract. Examiner notes applicants' statement that the amended limitation "greater than 9 % by weight" is supported by original disclosure since a formulation employs 9 weight % of carnauba wax is said to be outside the scope of the invention. However, it is also noted that there is no affirmative disclosure to support the weight range of the "at least one wax" between greater than 9 and less than 10 percent by weight of the total composition.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 59 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 59 lines 4-15, the phrase "at least one wax comprises a rice bran wax and a polyethylene wax" is vague and indefinite because it is not clear whether limitations require both types of waxes present in the composition.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1617

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7-9, 18-22, 24-29, and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Arraudeau et al. (US 5154916) ("Arraudeau").

Arraudeau discloses a wax-based mascara comprising 10 percent by weight of carnauba wax and keratin hydrolysate and gum, which are water-soluble polymers. See Example 4 in Arraudeau; instant claims 1-4, 7-9, and 18-22. In Example 4 in the Arraudeau, carnauba wax and beeswax are used in the ratio of 3.3 : 1. See instant claims 25-28.

The composition is also viewed as a wax-in-water emulsion, as the formula contains triethanolamine stearate, a well-known oil-in-water emulsion. See Jeffcoat et al. (US 5871756) col. 12, lines 30-36.

While there is no explicit teaching that the wax particles are greater than 1 micron, examiner views that a valid presumption can be made that the prior art does not particularly require the wax particles in nano-scale. Thus, absent evidence of contrary, it is viewed that the particle size of the wax used in Arraudeau should be no less than 1 micron.

### ***Response to Arguments***

Applicant's arguments filed on December 11, 2001 and March 14, 2002 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP
